Management Philosophy

Be a trustworthy partner for people, always being close at hand and endeavoring to protect their well-being.

Management Policy

We aim to become the No. 1 Japanese insurance company selected by customers.

1. We are always close to people's lives, offering easy-to-understand products and high-quality services.
2. We always ensure that employees who have contact with our customers make full use of their strengths to offer better customer services.
3. We create a working environment in which all employees can develop their talents and work with energy and vitality.
4. We practice sound management based on strong corporate governance, constantly creating new value to achieve sustainable growth.
5. We actively contribute to health promotion, environmental protection, and the development of local communities and society as a whole.
6. We work to communicate closely with all stakeholders.

Code of Conduct

1. We put the customer first in everything we do.
2. We offer comprehensive and heartfelt services by working together closely with our business partners.
3. We always improve ourselves, embarking on new challenges and contributing to the development of the company and society.
4. We leave no stone unturned in ensuring compliance based on a strong ethical sense of the company as a responsible member of society.
5. We respect human rights and create a diverse and inclusive working environment.

History

Japan Post Insurance Co., Ltd. was established as “Kampo Co., Ltd.” on September 1, 2006, under the Postal Service Privatization Act enacted in October 2005. During the period up to September 30, 2007, the Company prepared to launch operations as a life insurance company. On October 1, 2007, the Company changed its

trade name to “JAPAN POST INSURANCE Co., Ltd.”

The Company engages in the life insurance business and Postal Life Insurance management business under commission from the Organization for Postal Savings, Postal Life Insurance and Post Office Network (hereinafter, the “Management Network”).

September 2006	Established Kampo Co., Ltd. under the Postal Service Privatization Act
October 2007	Changed trade name to JAPAN POST INSURANCE Co., Ltd. in line with the commencement of the life insurance business Started Postal Life Insurance management operations under commission from the Management Network
December 2007	Obtained approval for new operations (liberalization of investment products)
June 2008	Commenced commissioned sales of life insurance products for corporate clients
July 2008	Launched <i>Sono hi kara</i> , a new hospitalization rider
July 2009	Established branches in all prefectures through the opening of the Nara Branch and Wakayama Branch

Note: For details, please refer to the Product Leaflet, the Insurance Design Document (Contract Outline), Precautions about Insurance Contracts (Information Calling for Attention), and Contract Guidelines and Policy Conditions.

Maximum Amount of Insurance Coverage

For the insurance policies offered by the Company, the maximum amount of insurance coverage per insured person is stipulated by Article 137 of the Postal Service Privatization Act and other regulations. Any application for insurance coverage exceeding the maximum amount shall be declined. If such excess in coverage is found after the insurance policy or rider is signed, such contract shall be cancelled.

Persons insured under Postal Life Insurance Policies, which were succeeded by the Management Network from Japan Post, can be insured under the Company's policy up to the amount calculated by deducting the insured amount of the Postal Life Insurance from the maximum amount of insurance coverage.

Maximum Coverage Amount of the Basic Insurance Policy

(As of July 1, 2026)

Note: In addition to the maximum coverage amounts stipulated by the above-mentioned law, there is a certain range of limitation on the maximum insurance coverage according to the age of the insured person or type of insurance, such as a limitation on the insurance amount if the age attained by the insured person is less than 15 years of age.

Maximum Coverage Amount of the Basic Annuity Policy

- First-year basic annuity amount of ¥0.9 million per insured person

Includes the annuity amount under longevity support insurance.

Maximum Amount of Insurance Coverage for Riders

Type of rider	Maximum amount of insurance coverage	Notes
<Accidental rider>	¥10 million in aggregate per insured person	In addition to the maximum coverage amounts stipulated by laws and regulations, there is a certain range of limitation on the insurance amount of the rider that can be added, according to the type of basic insurance policy.
Non-participating accidental rider		
<Nursing care rider>		
<Accident hospitalization rider>	¥10 million in aggregate per insured person	- The accidental rider, non-participating accidental rider and nursing care rider are under a separate heading. - In addition to the maximum coverage amounts stipulated by laws and regulations, there is a certain range of limitation on the insurance amount of the rider that can be added, according to the type of basic insurance policy.
<Illness hospitalization rider>		
<Illness and accident hospitalization rider>		
<Non-participating accident hospitalization rider>		
<Non-participating illness and accident hospitalization rider>		
<Non-participating injury medical care rider>		
<Non-participating general medical care rider>		
<Non-participating general medical care rider with relaxed underwriting criteria>		
Non-participating injury medical care rider (R04)		
Non-participating general medical care rider (R04)		
Non-participating general medical care rider with relaxed underwriting criteria (R04)		
Non-participating advanced medical care rider		

The Company does not currently provide the above riders written in angle brackets ("<>").

Maximum Amount of Total Insurance Premiums Payable

- ¥5.5 million on a combined basis for asset-formation savings insurance and asset-formation housing funding insurance

Apart from the above, asset-formation insurance products are subject to restrictions under relevant laws and regulations, such as the limitation of total amount of insurance premiums payable.

Briefing on Important Matters / Provision of Literature about Disadvantageous Information

We will present proposals that are beneficial and thus satisfactory to each customer, based on their individual circumstances including income and asset status, participation in other insurance policies, and life plans identified through the process of understanding individual needs and intention.

To prevent customers from suffering disadvantages due to not being informed adequately about insurance products and systems, we will provide careful explanations to ensure full understanding of our insurance policies, in consideration of each customer's age, knowledge and experience. We will also provide documents on the content of the respective insurance policies, including the policy coverage, the limitations

on benefit payments, amount of insurance coverage and the duty of declaration. To that end, we use summaries highlighting the key items we especially want customers to review—such as “Insurance Design Document (Contract Outline)” and “Precautions about Insurance Contracts (Information Calling for Attention)” —and explain these in detail.

We ask customers to make sure that they review the “Insurance Design Document (Contract Outline)” and the “Precautions about the Insurance Contract (Information Calling for Attention),” etc. and confirm that they understand the content, as well as that of the “Contract Guidelines and Policy Conditions,” before applying for enrollment.

Notice of Policy Details

Japan Post Insurance sends a “Notice of Policy Details” to each policyholder during their birth month every year so that policyholders can reconfirm their insurance coverage and policies’ details and update the information therein if necessary. This notice serves as information to ensure that policyholders can feel secure about continuing their policy contracts and that insurance benefits can be received without fail.

A list of policies held and details of policies have been compiled into a booklet so that customers can confirm the content of the policy such as coverage of the insurance policy held, the premiums paid, the policyholder dividend, the status of loans to the policyholder, the bank account for the receipt of insurance benefits and other benefits, and the designation of the beneficiary of insurance benefits and registered family members.

Management of Conflicts of Interest

To ensure that customers' interests are not unduly harmed by conflicts of interest arising from transactions between them and Japan Post Insurance, the Company has released the "Conflicts of Interest Management Regulations" based on the provisions of the Insurance Business Act Financial Instruments and Exchange Act, and other relevant laws and regulations. In accordance with these regulations, the Company engages in appropriate business conduct that

complies with laws and regulations, internal rules, and ethical standards.

Japan Post Group has released the "Japan Post Group Conflicts of Interest Management Policy." This Policy governs the management of conflicts of interest transactions by the Japan Post Group as a whole in order to prevent customers' interests from being unduly harmed.

Life Insurance Policyholders Protection Corporation of Japan

Unlike the Postal Life Insurance Policies before privatization, the life insurance policies of Japan Post Insurance after privatization do not involve government guarantees for payment of insurance claims. The policyholders' protection scheme applies to life insurance policies in the same way as other life insurance companies.

● Life Insurance Policyholders Protection Corporation of Japan

Life Insurance Policyholders Protection Corporation of Japan ("Protection Corporation") is a corporation established pursuant to the Insurance Business Act. It serves as a mutual assistance mechanism for the purpose of life insurance policyholder protection in the event of the default of a member life insurance company. The Protection Corporation engages in processes and measures, including financial support for facilitating the transfer of the insurance portfolio from the insurer in default, along with the succeeding insurer's general business administration, underwriting of the transferred portfolio and financial support for the payment of insurance claims covered under the policyholder protection scheme, as well as the purchase of rights of claim for the insurance concerned, in an effort to ensure policyholder protection, thereby sustaining the credibility of the life insurance industry.

Because of the nature of life insurance policies, taking out a new insurance policy under the same conditions as the insurer in default could involve some difficulty due to the policyholder's age and health status. Therefore, in the event of the default of an insurance company, the Protection Corporation provides financial support for the transfer of the insurance portfolio, thereby ensuring continuous insurance coverage for the policyholder.

The portfolio subject to transfer covered under the policyholder protection scheme must, according to the provisions of the Insurance Business Act, etc., comprise life insurance policies originally written in Japan (excluding those associated with the specified special account^(*) for performance-linked insurance contracts), in which the limits of indemnity are set to be equivalent to 90% of the relevant policy reserve, etc.,^(*), except for the high assumed interest rate

policies^(*) (which does not mean that the policyholder protection scheme provides 90% of the level of protection provided by the original insurance claims or annuities^(*)).

The transfer of the insurance portfolio might involve, apart from the reduction in policy reserve, etc., changes in experience assumptions (including assumed interest rate, assumed rate of mortality, and assumed rate of expenses) that serve as the basis of calculating policy terms and conditions, in order to ensure adequate maintenance of the insurance portfolio with reasonable security on a continuous basis, which could entail a reduction in the level of protection provided by the original insurance policies or annuities. Furthermore, special early surrender loading (involving a special surrender charge apart from the normal surrender charge for a certain period of time, for the purpose of sustaining a group of insured parties and the insurance policies associated therewith) might be established.

*1 This refers to a special account for the insurance policies that do not involve minimum guarantees (such as guaranteed minimum death benefit and guaranteed minimum maturity benefit) of the insurance policies involving the establishment of a special account. Corporate reorganization procedures for the insurer in default might be based on the preparation of a reorganization plan without involving a reduction in the policy reserve, etc., for the insurance policies concerned (whether such reduction is implemented or not shall be determined in the course of an individual reorganization procedure).

*2 Policy reserve, etc., refers to the reserve funded based on insurance premiums and investment proceeds for the future payment of insurance claims, annuities, and benefits.

*3 This refers to the policies with an assumed interest rate constantly higher than a basic interest rate^(Note 1) in the five years prior to the default.^(Note 2) For such policies, the limit of indemnity for the policy reserve, etc., shall be as follows, provided, however, that such limit shall not go below the limit of reimbursement in the case where no financial support is provided to the insurer in default.

*4 Likewise, it does not mean that the Protection Corporation provides 90% of the level of the guaranteed minimum maturity benefit originally provided under the individual variable annuity.

$$\text{Indemnity ratio in high assumed interest rate policies} = 90\% - \frac{\text{[aggregate of (assumed interest rate less basic interest rate in each year in the past 5 years)]}}{2}$$

Notes: 1. The basic interest rate shall be determined by the Commissioner of the Financial Services Agency and the Minister of Finance, based on the average rate of investment returns in the past five years at life insurance companies. The current basic interest rate is 3% (information about the current basic interest rate is provided on the Company's website).

2. In the case where different assumed interest rates apply to the basic coverage and riders under one policy, each such basic coverage and rider applied by a different assumed interest rate shall be regarded as an independent insurance policy, and subject to the evaluation to determine whether it constitutes a high assumed interest rate policy. Meanwhile, in the case of a collective insurance policy, such as a group insurance policy where a premium is paid by each insured individual to whom a different assumed interest rate applies, each such insured individual is considered to have taken out an independent insurance policy individually, and is subject to the evaluation regarding whether or not such independent individual policy constitutes a high assumed interest rate policy. However, in the case of defined contribution plan products, each insured individual is subject to the evaluation regarding whether or not he/she is a holder of a high assumed interest rate policy, regardless of whether he/she pays the premium.

● Illustrated Outline of the Scheme

In the case where a rescuing insurer appears

In the case where no rescuing insurer appears

Notes: 1. The aforementioned "public financial support" is provided in the form of a government measure against the default of a life insurance company in the period up to the end of March 2027, approved through deliberation in the Diet, in the case where contributions by the member insurers fail to cover the cost for the financial support.

2. This refers to the payment of insurance claims, covered under the policyholder protection scheme based on insurable events during the default proceedings, as well as the Protection Corporation's purchase of rights to claim insurance money, etc., associated with the insurance policies covered under the policyholder protection scheme. In such instances, the payment ratio and purchase ratio are the same as the ratio of the limit of indemnity for policy reserve, etc. (The ratios in the case of high assumed interest rate policies are as described in (*).)

* All descriptions of the scheme, including the scope and the limit of indemnity of the policies covered under the policyholder protection scheme, are based on current laws and regulations, and could be subject to change in the future in accordance with revisions of relevant laws and regulations.

[Reference] Government guarantee for the Postal Life Insurance Policies

The administration of the Postal Life Insurance Policies taken out before privatization will be passed on to and managed by the Management Network until expiry. The government guarantee for the payment of insurance claims associated with them will continue until those policies expire.

Unlike the Postal Life Insurance Policies, the life insurance policies of Japan Post Insurance do not involve a government guarantee for the payment of insurance claims. The policyholders' protection scheme applies to the life insurance policies in the same way as other life insurance companies.

Principal Risk Categories and Definitions

The Company manages risk by designating risk management sections in the respective risk categories. The Risk Management Department, which is in charge of the overall control of risk management, verifies the status of respective risk management sections based on their reports, while periodically reporting on relevant matters to the Risk Management Committee.

Risk management in each risk category is described in the sections below.

Insurance Underwriting Risk

Life insurance policies are contracts that provide long-term coverage to policyholders against the risk of death, illness, or injury. When underwriting, the Company needs to make an accurate assessment and analysis of potential risks and appropriately reflect identified risks in the premiums.

Accordingly, the Company undertakes such activities as verifying its setting of premium rates and assessing and analyzing the occurrence of insured events.

The Economic Value Promotion Office of the Actuarial and Accounting Department, which is the section that manages underwriting risk, conducts risk

management appropriately by measuring the amount of insurance underwriting risk, evaluating the profitability of each product sold, and verifying the appropriateness of the Company's underwriting standards from a medical perspective.

As required in managing insurance underwriting risk, the Company cedes reinsurance upon fully studying the financial status of reinsurers. On the other hand, when underwriting reinsurance, the Company secures the required information, studies the profitability and risk characteristics, and verifies whether the underwriting risk is limited so as to cause no serious impact on management.

Investment Risk

To provide for an anticipated payment of insurance claims and other benefits, the Company needs to carefully manage funds entrusted to it from customers under life insurance policies.

Based on this perspective, in order to maintain sound management and offer assurance to customers, the Company has a basic investment policy to ensure stable asset management by investing in and financing yen-denominated interest-bearing assets, such as Japanese government and corporate bonds and loans, matched to the long-term and fixed interest rate characteristics of its liabilities. With a view to improving profitability, the Company also strengthens its asset management capabilities, considering market constraints and soundness.

The Investment Risk Management Office of the Risk Management Department, which is the section in charge of investment risk management, and the General Affairs Department are assigned the task of managing investment risk. These sections monitor investment risk and enforce appropriate management while striving to develop risk management systems in line with the risk profile of the Company's asset portfolio, under a checks and balances system with departments of the head office in charge of business execution.

In addition, appropriate risk management is implemented for collateral assets related to reinsurance.

Funding Risk

The life insurance business involves making and receiving payments to and from customers and business partners as the Company pays insurance claims and other benefits and conducts fund management. Any trouble in the settlement of these funds will not just cause inconvenience to the parties concerned but will also lead to situations that preclude the continued operation of the business itself.

To avoid such situations and ensure smooth cash flows, the Company enforces rigorous fund management by monitoring incoming and outgoing cash flows, including the receipt of premiums and

payment of insurance claims, on a daily basis.

The Cash-Flow and Expense Management Office of Actuarial and Accounting Department, which is the section responsible for funding risk management, has defined categories corresponding to cash flow tightness and established risk management standards in each category. This section implements appropriate management of funding risk by performing management and verification in accordance with these standards. Moreover, the Company carries out stress tests related to funding risks, assuming a large amount of policy surrenders and lapses, in an effort to improve cash flow management.

Market Liquidity Risk

The Company might sell assets in which it has made investments using funds entrusted to it from customers, and could incur losses when it is forced to execute such transactions at extremely unfavorable prices compared to normal or is unable to execute such transactions at all because of market turmoil.

Accordingly, the Company makes investments primarily in assets with high liquidity.

The Investment Risk Management Office of the Risk

Management Department, which is the section in charge of market liquidity risk management, confirms, among other things, that sufficient liquidity assets can be secured in the event of current and future cash flow stress. The section implements the appropriate management of market liquidity risk by performing management and verification.

Operational Risk

Executive officers, employees and others of the Company strive to prevent operational risks that could cause inconvenience to the Company's customers or losses to the Company, and to take appropriate actions when such risks materialize. The Company has designated risk management sections in each detailed subcategory of operational risk, thereby identifying and assessing the location, scale,

and nature of operational risks across the company and managing the risk according to severity. In this way, the Company prevents operational risk from materializing and minimizes losses in the event it does. The Risk Management Department works in collaboration with these risk management sections and provides comprehensive management of operational risk.

1) Processing Risk

Errors in business processing will cause considerable inconvenience to customers and result in the loss of the Company's credibility. Therefore, departments of the head office and branches autonomously assess and address accidents that have occurred in the past and those that could foreseeably occur. This information is used to formulate and develop rules and standards to facilitate prompt and accurate

administrative processing, as well as to supervise and educate employees.

The Business Process Services Department, which is the section in charge of processing risk management, evaluates and verifies whether risk management is appropriately conducted in each organization and makes efforts to suppress and minimize processing risk.

2) Computer System Risk

Under the current situation where the extensive scope of the Company's business processing relies on information systems, major system failures or delays in system development could cause considerable inconvenience to customers and result in the loss of the Company's credibility. Therefore, as the section responsible for computer system risk management, the IT Systems Management Department strives to reduce computer system risk by verifying and supervising that the risk is appropriately managed by system administration personnel in the departments that maintain information systems.

The Company has formulated a manual to respond to a major system failure and set up a structure to take immediate action. For the overall information systems for Japan Post Insurance, which are the Company's main systems, the Company operates central computer centers as well as backup centers in order to respond to risk resulting from a system failure. In the event of a system failure, the Company investigates the impact on customers, analyzes the causes, and implements appropriate countermeasures in order to prevent recurrence.

3) Other Operational Risk Subcategories

Other detailed subcategories of operational risk are legal risk, human risk, reputational risk, tangible asset risk, outsourcing risk, and compliance risk. For each subcategory, the Company designates a section to

handle risk management, undertakes relevant activities, and implements initiatives to enhance its risk management frameworks.
