

Outline of Financial Results for the Six Months Ended September 30, 2025

November 14, 2025

Summary of Financial Results

	6 months ended Sep-25	Year on Year
Net income¹	¥ 93.8bn	+ ¥ 30.9bn + 49.3 %
Adjusted profit	¥ 95.0bn	+ ¥ 10.7bn + 12.8 %
New policies (Individual Insurance)	(Number) 248K policies (Annualized premiums) ¥ 56.6bn	(272) K policies (52.3) % ¥ (56.4) bn (49.9) %
Policies in Force (Individual Insurance)	(Number) 18,219K policies (Annualized premiums) ¥ 2,757.6bn	(590) K policies (3.1) % ¥ (98.1) bn (3.4) %
Value of new business	¥ 36.4bn	¥ (1.3) bn (3.6) %
EV	¥ 4,255.1bn	+ ¥ 314.2bn + 8.0 %

【Financial Highlights】

- Net income increased by ¥ 30.9bn (+ 49.3%) year on year, as a result of decrease in the increased burden of regular policy reserves in the first year of new policies and an increase in positive spread, etc. caused by an improvement in the market environment, etc.
- Adjusted profit amounted to ¥ 95.0bn, which increased by ¥10.7bn (+ 12.8%) year on year, as a result of excluding the decrease in the increased burden of regular policy reserves in the first year of new policies, etc., from net income.

【Revisions to Forecasts for Full-year Financial Results for the Year ending March 31, 2026】

- We have revised forecasts for consolidated net income and adjusted profit for FY26/3 upward, mainly due to an increase in investment income caused by an improvement in the market environment, etc. and a decrease in operating expenses.
- Revised adjusted profit is forecast to be approx. ¥162.0bn (approx. +¥20.0bn) and achievement toward it is 58.7%.
- Regarding shareholder returns, we have also decided to carry out acquisition of treasury stock not exceeding ¥ 45.0bn. Details are stated on P14.

【Policy Sales】

- The number of new policies for individual insurance decreased by 52.3% year on year due to the impact of the decrease in sales of lump-sum payment whole life insurance, etc.
- The number of policies in force decreased by 590 thousand policies ((3.1) %) from the end of the previous fiscal year. We continue to aim for a swift turnaround and recovery in the new category.

【Embedded Value】

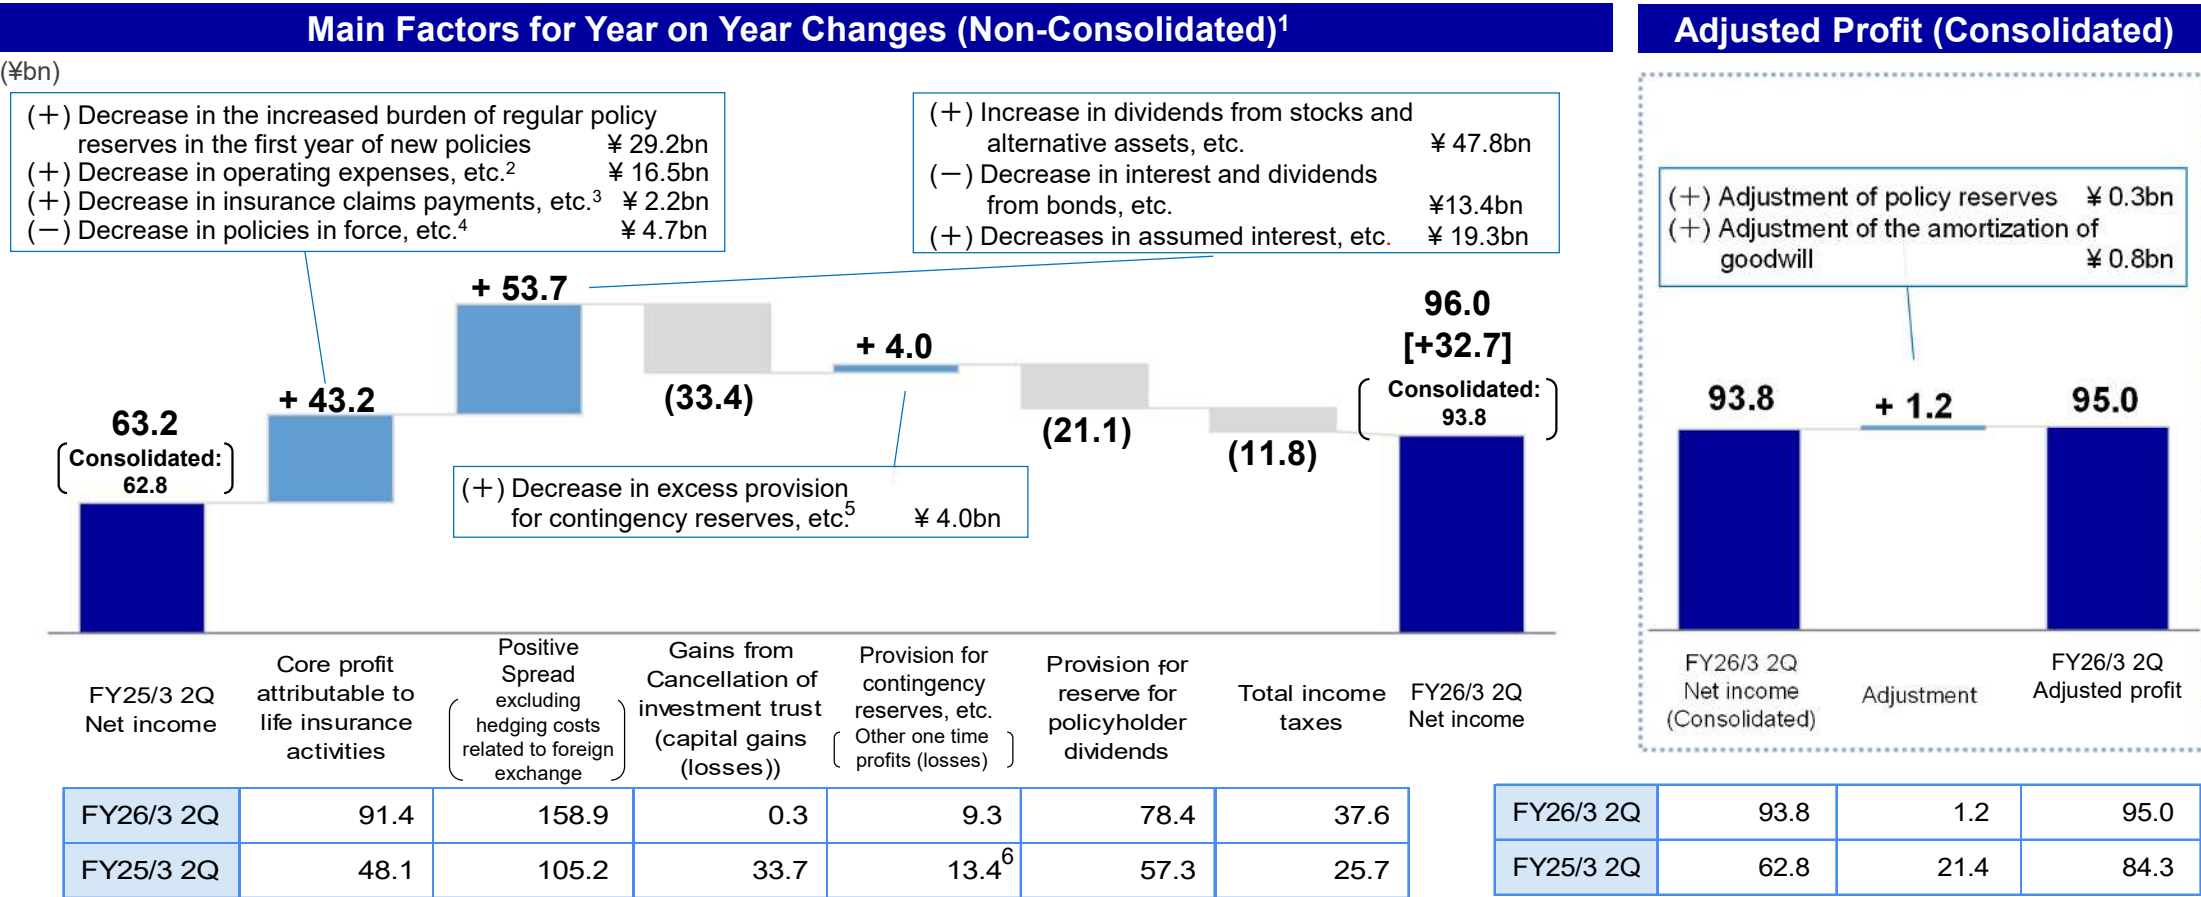

- Value of new business decreased by ¥ 1.3bn ((3.6) %) year on year as a result of the decrease in the number of new policies, although there was an increase due to higher interest rates.
- EV increased by ¥ 314.2bn (+8.0%) from the end of the previous fiscal year, due to an increase in unrealized gains in domestic stocks, etc. caused by an increase in the share prices of domestic stocks.

1. Net income attributable to Japan Post Insurance.

[Altered the factors shown in this slide in FY25/3 4Q]

Factors for Year on Year Changes (Main factors that affect net income, etc.)

- Net income increased year on year to ¥ 96.0bn, as a result of increase in the core profit attributable to life insurance activities due to the decrease in the increased burden of regular policy reserves in the first year of new policies and the increase in positive spread excluding hedging costs related to foreign exchange, etc.
- Adjusted profit, the consolidated net income adjusted for the impact of the increased burden of regular policy reserves in the first year of new policies and the impact of amortization of goodwill, amounted to ¥ 95.0bn.

1. Only includes main factors for changes that affect net income. For year on year changes including other factors, please refer to next page.

2. "Decrease in operating expenses, etc." shows the difference between FY25/3 2Q and FY26/3 2Q. This figure is calculated by adding up "Operating expenses" and "Other ordinary expenses."

3. Impact mainly from the payment of hospitalization benefits and the reversals of reserve for outstanding claims.

4. Amount including the impact of the reversal of additional policy reserve that was accumulated in March 2025.

5. Mainly due to the fact that the excess provisions for contingency reserves that had been implemented since FY21/3 terminated before June 30, 2024.

6. Excluding the reversals due to exceeding the limit of the contingency reserve in the previous fiscal year.

Factors for Year on Year Changes in Detail

Factors for Year on Year Changes (Non-Consolidated)

(¥bn)

Total income taxes	25.7	37.6	11.8	—
Net income (Non-consolidated)	63.2	96.0	32.7	—

Note1: Among factors with (a), regarding capital gains or losses and hedging costs related to foreign exchange included in the positive spread, we continued to adopt accounting treatments to provide or to reverse the reserve for price fluctuations, which are recorded as extraordinary gains or losses, to neutralize their impact on net income (a') (gains from cancellation of investment trust are excluded from the provision of reserve for price fluctuations).

Note2: In the six months ended September 30, 2024, reversals of contingency reserves occurred due to exceeding the limit of the contingency reserve (b). The amount of this reversals was provided for the price fluctuations reserve (b') (the impact on net income was neutral).

1. Impact mainly from the payment of hospitalization benefits and the reversals of reserve for outstanding claims.
2. Amount including the impact of the reversal of additional policy reserve that was accumulated in March 2025.

Adjusted Profit (Consolidated)

Embedded Value

- EV as of September 30, 2025 was ¥ 4,255.1bn mainly due to the increase of unrealized gains of domestic stocks caused by the increase of the market value of domestic share (+ ¥ 314.2bn from the end of the previous fiscal year).
- Value of new business was ¥ 36.4bn (¥ (1.3)bn year on year) since, while the new business margin increased due to the impact of higher interest rates, the number of new policies decreased.

1. Based on new policies from April 2025 to September 2025, economic assumptions as of June 2025 are used for new policies from April 2025 to June 2025, and assumptions as of September 2025 are used for new policies from July 2025 to September 2025. The value of new business includes the increase or decrease due to conditional cancellation and conversion.
2. The value of new business divided by the present value of future premium income.

Movement Analysis of EV

1. The numerator is calculated by excluding economic variances factors. Furthermore, regarding the investment in Daiwa Asset Management Co. Ltd., the amortization of goodwill of ¥0.8 billion for the period under review was added back to the numerator, and the unamortized balance of goodwill of ¥33.6 billion as of March 31, 2025 was deducted from the denominator.
2. Including the repurchase of treasury stocks (agreed) of ¥(1.9) billion carried out from April 1, 2025.

Revisions to the Forecasts for Full-year Financial Results for the Year Ending March 31, 2026 and Shareholder Return

- The forecasts for consolidated net income and adjusted profit for the fiscal year ending March 31, 2026 have been revised upward, mainly due to an increase in investment income caused by an improvement in the market environment, etc. and a decrease in operating expenses (see P18 for details).
- As an additional measure for shareholder returns for FY26/3, we have decided to carry out acquisition of treasury stock not exceeding ¥ 45.0bn (as for dividend per share, no change is being contemplated as scheduled).

Stable Dividend
Aim not to decrease but to increase dividends per share in principle

Taking timely measures, including acquisition of treasury stock

Decided to carry out acquisition of treasury stock not exceeding ¥ 45.0bn², as part of our shareholder return for FY26/3 (Nov. 2025-Mar. 2026)

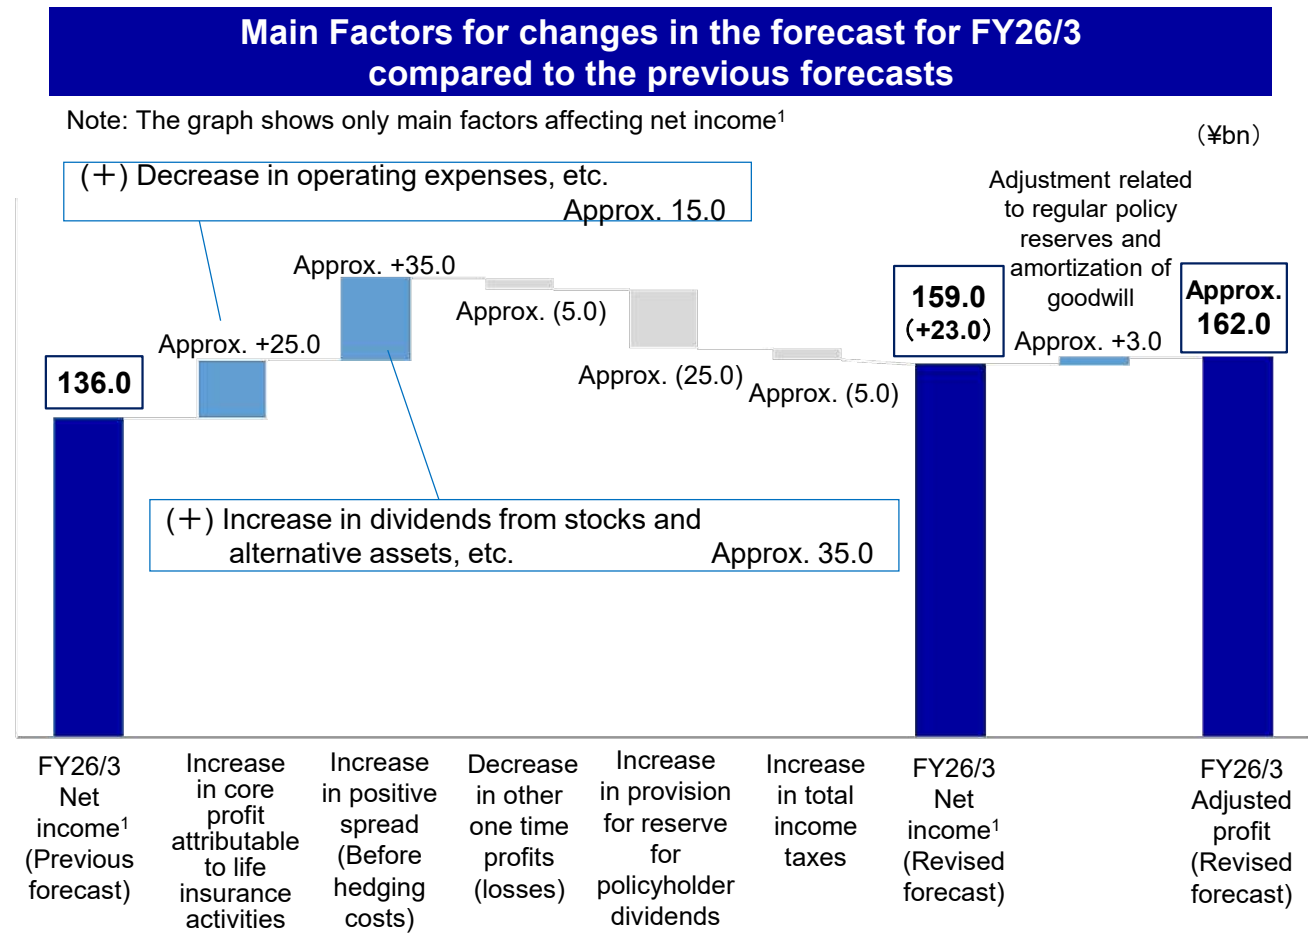

- Assuming the implementation of the acquisition of ¥ 45.0bn (maximum) treasury stock.
- In consideration of the acquisition of treasury stock, the Company will continue to ensure that the ratio of voting rights of JAPAN POST HOLDINGS Co., Ltd. will be maintained at 50% or less. Therefore, depending on the status of the ratio of voting rights, etc., the amount of treasury stock to be acquired may be significantly less than ¥ 45.0bn

APPENDIX

Revisions to the Forecasts for Full-year Financial Results for the Year Ending March 31, 2026

(Factors for changes from previous forecasts)

- Revised forecast for consolidated net income upward from ¥136.0bn to ¥159.0bn due to an increase in core profit attributable to life insurance activities, an increase in positive spread before hedging costs, and an increase in provision for reserve for policyholder dividends, etc.
- Revised forecast for adjusted profit upward from approx. ¥142.0bn to approx. ¥162.0bn after applying adjustment for policy reserve and for amortization of goodwill to consolidated net income.

Factors for Year on Year Changes in Detail		(¥bn)
FY26/3 Net income ¹ (Previous forecast)		136.0
Increase in core profit attributable to life insurance activities		Approx. 25.0
Increase in positive spread (including hedging costs)		Approx. 25.0
Increase in hedging costs		Approx. (10.0)
Decrease in capital gains (losses)		Approx. (25.0)
Decrease in other one time profits (losses)		Approx. (5.0)
Decrease in provision for reserve for price fluctuations		Approx. 35.0
Increase in provision for reserve for policyholder dividends		Approx. (25.0)
Increase in total income taxes		Approx. (5.0)
FY26/3 Net income ¹ (Revised forecast)		159.0
Adjustment		Approx. 3.0
Adjustment related to regular policy reserves in the first year		Approx. 1.0
Adjustment related to amortization of goodwill		Approx. 2.0
FY26/3 Adjusted profit (Revised forecast)		Approx. 162.0

Definitions of Adjusted Profit and Adjusted ROE

Definitions of adjusted profit and adjusted ROE

$$\begin{aligned}
 &\text{Adjusted profit} \quad \left(\begin{array}{c} \text{Source of} \\ \text{shareholder return} \end{array} \right) = \text{Consolidated net income} + \text{Burden of regular policy reserves in the first year}^1 + \text{Amortization of goodwill}^2 \\
 &\text{Adjusted ROE} = \text{Adjusted profit} \div \left(\text{Shareholders' equity}^3 - \text{Unamortized balance of goodwill}^2 \right)
 \end{aligned}$$

1. In order to partially adjust for the short-term reduction in net income as new policies increase, we add the burden of regular policy reserves in the first year (after tax) when calculating adjusted profit (from FY25/3 and onward).
2. In order to reflect the Company's intrinsic earning capacity, we add back the amount of amortization of goodwill deducted from net income associated with the investment in Daiwa Asset Management Co. Ltd. (completed in October 2024). We also deduct the unamortized balance of goodwill (average) from the denominator of adjusted ROE.
3. The net unrealized gains (losses) on available-for-sale securities are mainly due to the Postal Life Insurance category.⁴ Shareholders' equity (average) is used as the denominator in view of the high policyholder dividend ratio in the Postal Life Insurance category⁴ and the fact that gains and losses from the sale of securities etc. do not affect adjusted profit due to the provision and reversal of reserve for price fluctuations.
4. "Postal Life Insurance category" shows the amounts generated from the postal life insurance policies.

[Reference] Adjustment Concerning the Burden of Regular Policy Reserves

[Reference(As disclosed on May 15, 2025)] Burden of regular policy reserves included in the profit for the fiscal year ended March 31, 2025

- The burden of regular policy reserves arose mainly for lump-sum payment whole life insurance policies that commenced during the period from April to September 2024 due to the difference between assumed rates of return (0.95%) and the standard rate of return (0.75%)
- In order to partially adjust for the short-term reduction in net income as new policies increase, we add the burden of regular policy reserves in the first year (after tax) when calculating adjusted profit

The figure below shows an illustration of the annual amounts of provision and reversal of regular policy, taking the burden of regular policy reserves in the first year as 100.

Burden of regular policy reserves (before tax) by fiscal year in which new policies commenced

1. The cumulative burden of regular policy reserves (before tax) for new policies that commenced in each year. Positive numbers indicate the reversal and negative numbers indicate the provision of policy reserves.

Burden of regular policy reserves expected in the revised financial results forecasts for the fiscal year ending March 31, 2026

- At present, insurance premium rates for the fiscal year ending March 31, 2026 have not been decided. In the calculation of the revised financial results forecast for the fiscal year ending March 31, 2026, the burden of regular policy reserves in the first year of new policies (after tax) is set at approx. ¥ 1.0bn.

- 1. Accumulation rate for policy reserves based on Public Notice No. 48 issued by the Ministry of Finance in 1996.
- 2. The basic rate is calculated using the stability coefficient designated in the Public Notice, based on the rate in the table above.
- 3. If the basic rate and the standard rate applied on the record date differ by 0.25% or more in the case of lump-sum payment products, or 0.50% or more in the case of level premium products, the standard rate for the date of application onward is revised to the multiple of 0.25% that is closest in value to the basic rate.

1. From FY24/3, the company has changed the definition of "numbers of cancelled policies" from "the sum of death, maturity, surrender and lapse" to "the sum of death, maturity, surrender and lapse, and other decreases (mainly the sum of cancellations, invalidations, and rescissions)." Figures for the numbers of cancelled policies in this document are based on the revised definition.

2. Plus signs indicate provisions, while brackets () indicate reversals.
